EDUCATION

University Of Illinois Urbana Champaign

August 2023 – May 2027

BS In Computer Science & Advertising, Minor In Economics And Math

GPA 4.00/4.00 (Deans List 4x)

- **James Scholar** for impeccable academic performance and completion of **higher level coursework**
- **Florence J Johnson Scholar** for “outstanding” and “exceptional” achievements in college work and leadership.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, C, Rust, Swift, Golang, Bash, React, Angular, SpringBoot

Frameworks & Tools: AWS, Databricks, dtrace, Git, conda, TensorFlow, PyTorch, Node.js, Linux, POSIX, IPC

EXPERIENCE

Incoming Technical Product Manager Intern @ Amazon

May 2026 – August 2026

Artificial Intelligence Intern

May 2025 – August 2025

Mphasis – C++, Python, TensorFlow, Angular, DB2

New York, NYC

- Engineered a high-throughput fuzzy-matching service in C++ and Python, using **semantic similarity**, to process **10,000+ financial records/minute** boosting accuracy in ML-driven credit risk modeling for loan underwriting.
- Collaborated with cross functional engineering and data teams to **productionize ML interference layers** and implementing caching strategies that **reduced response time by 35%** and **enhanced system scalability**.
- Replaced **LLM pipelines with SLM's** and worked around with **hetero-agentic systems** saving costs by 65%.
- Constructed an **AI evaluation pipeline** that accelerated heuristic tuning cycles by **40%**, boosting model reliability.

Machine Learning Intern

January 2025 – May 2025

NCSA SPINS Program – C++, JavaScript, Flutter

Champaign, Illinois

- Built a distributed mHealth platform integrating Ollama APIs, AR modules, and AWS S3 to log multimodal conversational data for large-scale analytics, supporting **500+ concurrent sessions** with high-throughput ingestion.
- Implemented multithreaded pipelines and async I/O schedulers, **cutting latency by 35%** and improving throughput
- Deployed a modular Flutter client with 35 adaptive configurations and GPU inference logging, **with 97% accuracy**.

Software Engineering Intern

May 2024 – July 2024

Geopop – C++, Python, Rust, Oracle, IMS

Mumbai, Maharashtra

- Created an **ML-driven analytics engine** combining **NLP + Geospatial modelling** to detect and rank venture signals and spatial inference on **50k+** data points to uncover **high growth** markets and early stage investment trends.
- Designed **C++ backed ETL pipelines** to ingest, clean and analyse transactional data from over 5000 transactions, identifying high-performing SKU's, peak sales windows, and data anomalies to guide product and marketing strategy.

LEADERSHIP & INITIATIVES

Senior Project Manager

February 2024 – Present

OTCR Consulting - Power BI, Tableau, SQL, jQuery, COBOL

Champaign, Illinois

- Assisting **Google** carry out risk assessments and tech automation within the legal regulatory space as **the lead project manager**, focusing on synthesizing insights, drafting pitch decks and authoring research documents.
- Developed an **AI insights chatbot** using NLP and clustering techniques to analyze 1,000+ interview transcripts, transforming qualitative feedback into quantifiable data points for client decision-making and strategy alignment

AdTech President

June 2024 – May 2025

American Advertising Federation - Visio, JIRA, Confluence, Go

Champaign, Illinois

- **Founded** AdTech as the technology consulting arm within the **largest student organization at UIUC**; grew membership from **0 to 75+ in under a semester** with targeted outreach, speaker events, and partnerships.
- Orchestrated a campus wide AI hackathon **attracting 150+ students**; introduced hands on workshops with emerging **AI tools like Cursor, Lovable and Notion AI** to democratize technical upskilling.

PERSONAL PROJECTS

Abode

- Co-founded a student housing app with **17,000 users**, simplifying the leasing process from start to sign.
- Built a multithreaded, cloud scaled backend with parallel data pipelines for faster, low-latency performance.

DevangarAI

- Made an AI linguistic app with **1000+ users**, leveraging real time OCR to detect and classify languages on the fly.
- Awarded “**Best Product**” in UIUC’s largest honors course for innovation, real world applicability and execution.
